

Dear Hiring Manager,

As a passionate gamer with over 1,000 hours invested in Fortnite, I am thrilled to apply for the Game Design Intern position at Epic Games. My deep appreciation for the creativity and innovation behind Epic Games' titles, combined with my technical and leadership experience, makes me eager to contribute to the development of groundbreaking gaming experiences.

Currently pursuing a Bachelor's in Computer Science at Drexel University, I have developed strong technical skills in Python, JavaScript (React, Angular, Node), and game development tools. My hands-on experience with collaborative projects, such as leading the data science component of a web-based solution addressing food insecurity during Drexel's Digital Development Program, demonstrates my ability to balance technical execution with creativity and problem-solving.

As a gamer, I have an intimate understanding of what makes games immersive and engaging. My extensive time in Fortnite has provided me with a player's perspective on game mechanics, design choices, and balancing challenges. This personal connection to Epic Games' work drives my enthusiasm for shaping user experiences that resonate with millions of players worldwide. Beyond gaming and programming, my leadership skills as a swim team captain and entrepreneurial experience managing a bike repair shop have refined my ability to communicate effectively, work collaboratively, and organize tasks to meet deadlines. I believe these skills are critical for success in a fast-paced, innovative environment like Epic Games.

Joining Epic Games as a Game Design Intern represents the perfect opportunity to combine my technical expertise, leadership, and love for gaming to contribute to the creation of unforgettable player experiences. I am eager to bring my skills and passion to your team while learning from industry leaders.

Thank you for considering my application. I would welcome the chance to discuss how my background aligns with the needs of your team.

Sincerely,
Srinarayan Srikanth
