

Dear Hiring Manager,

As a passionate gamer and aspiring programmer with over 1,000 hours of Fortnite gameplay, I am excited to apply for the Gameplay Programmer Intern position at Epic Games. My love for gaming, paired with a strong technical foundation in programming and problem-solving, fuels my desire to create immersive, high-quality experiences for players around the world.

I am currently pursuing a Bachelor's in Computer Science at Drexel University, where I have honed my skills in Python, Java, JavaScript, and AI-driven programming. Through collaborative projects like Drexel's Digital Development Program, I demonstrated my ability to design, build, and iterate on technical solutions, such as developing a web platform to address food insecurity. These experiences cultivated my skills in teamwork, debugging, and implementing efficient code under tight deadlines.

Epic Games has been a source of inspiration for me as a gamer and developer. Spending countless hours in Fortnite has given me a firsthand appreciation of well-designed gameplay mechanics and engaging player experiences. I understand the importance of balancing technical innovation with user satisfaction, and I'm eager to contribute my technical expertise and gamer insight to Epic's development team.

Additionally, my leadership experience as a swim team captain and entrepreneurial venture running a bike repair shop have taught me how to communicate effectively, organize tasks efficiently, and work collaboratively toward shared goals—all crucial skills for success in game development.

I am inspired by Epic Games' commitment to pushing the boundaries of interactive entertainment and would be honored to contribute to that vision. Thank you for considering my application.

Sincerely,  
Srinarayan Srikanth
