

Dear Hiring Manager,

I am thrilled to apply for the Engineering Apprentice position at Lockheed Martin. As a first-year Computer Science student at Drexel University, I had the opportunity to meet your representatives at the Drexel CCI Career Fair, where I was inspired by Lockheed Martin's dedication to advancing technology and fostering innovation in aerospace and defense. This opportunity aligns perfectly with my passion for solving real-world challenges through technical excellence and collaboration.

My background includes hands-on experience in various programming languages such as Python, Java, and JavaScript, complemented by skills in AI and data analysis. During Drexel's Digital Development Program, I served as the data science lead on a team that developed a web-based solution to address food insecurity. This role required strong technical abilities, teamwork, and the ability to communicate complex concepts effectively—a skill I have honed through both academic and extracurricular endeavors.

As captain of my high school swim team, I developed leadership, communication, and organizational skills that have become central to my professional approach. Coordinating a diverse team taught me the importance of motivating individuals, managing resources efficiently, and achieving collective goals under tight deadlines. Additionally, my entrepreneurial experience running a community bike repair shop during the pandemic highlights my initiative and ability to adapt to challenges creatively and effectively.

The Engineering Apprentice role at Lockheed Martin offers the opportunity to build on my skills while contributing to innovative projects that have a meaningful impact. I am especially excited to bring my strong work ethic, organizational mindset, and passion for learning to a team committed to excellence.

Thank you for considering my application. I welcome the opportunity to discuss how my experiences and aspirations align with Lockheed Martin's mission.

Sincerely,

Srinarayan Srikanth
