

Dear Hiring Manager,

I am writing to express my strong interest in the Co-op Technical position at Lockheed Martin. As a driven Computer Science sophomore at Drexel University, with a passion for software design and development, I am confident my skills align with your requirements. I am a U.S. citizen and have attached my resume for your review.

My academic background at Drexel University, including my enrollment in the Pennoni Honors College and as an A.J. Drexel Scholar, provides a solid foundation. I have also pursued certifications in Full Stack Web Development and AI with Python, demonstrating my commitment to continuous learning.

I possess strong technical skills in Python, Java, and C++, along with experience in backend/database (Flask, Supabase), cloud platforms (AWS Bedrock, Azure), and AI/ML (PyTorch, Google Gemini).

My recent AI Product Intern role at Neural Metrics involved developing an AI-driven intelligent code verification system, projected to reduce manual review effort by 50%. I utilized Jenkins, Gemini, AWS, and Docker to enhance CI/CD pipeline efficiency, and engineered a prompt evaluation system for AI model accuracy. My projects, such as the "AI-Powered Personal Coach" (React, Tailwind CSS, Supabase, Google Gemini AI) and "ASlearn - AI-Powered Sign Language Learning Platform" (React.js, PyTorch, AWS), further highlight my capabilities in software development, data engineering, and AI application.

I am particularly drawn to Lockheed Martin's emphasis on innovation and empowering employees, and I am eager to contribute to meaningful projects. I am a collaborative individual, prepared to obtain a security clearance.

Thank you for your time and consideration. I am excited about this opportunity and am available for an interview at your earliest convenience.
