

Dear Hiring Committee,

I am writing to express my interest in the SAP iXp Software Development and Testing Co-op position for the Fall/Winter 2025–2026 cycle. As a Computer Science student at Drexel University with a strong foundation in software development and a passion for learning new technologies, I am excited about the opportunity to contribute to SAP's mission of helping the world run better.

At Drexel, I have gained hands-on experience through coursework and hackathons that required agile collaboration, writing clean and efficient code, and implementing both manual and automated testing practices. My recent project involved using Flask and PyTorch and to build an AI-based sign language learning tool, and I've also worked with React and SQL for full-stack web development. These experiences have strengthened my ability to thrive in fast-paced, cross-functional environments like the one described for this role.

What draws me to SAP is the culture of innovation and global impact. I am particularly inspired by SAP's commitment to collaboration and mentorship, which aligns with my own values as a team-oriented and driven individual. I take initiative, enjoy solving complex problems, and am always seeking to expand my technical and professional toolkit.

I am eager to bring my curiosity, adaptability, and technical skills to the SAP iXp program while continuing to grow under the guidance of industry leaders. I am available to work the full six-month co-op cycle and would welcome the chance to contribute to SAP's ongoing success.

Thank you for considering my application. I look forward to the opportunity to speak with you further about how I can support SAP's goals.

Sincerely,

Srinarayan Srikanth
